Join Us in a Movement for Real Change

The Democrats replaced the Republicans in Albany and Washington, but little changed—the big bank and corporate special interests continue to prevail over the broad public interest. The corporate-financed Democrats take progressives for granted because they won't vote for Republicans who are even worse. It's time to give progressives somewhere to go—a positive alternative alternative to the two-party system of corporate rule. 50,000 votes wins a ballot line for the Green Party in New York for the next four years.
